Summary

Motivated Junior Front-end Developer with experience in UI/UX design. Seeking for an opportunity where I will be able to develop my skills and on the other hand, my knowledge and passion will be beneficial for the company.

Portfolio

Guess Warmer

Mini-game for guessing warmer city. (Code [here](#))

- Planned and implemented the app's architecture, developed the project using React.js.
- Used OpenWeatherMap API for getting weather data.
- Used React Context API for managing the app's state.

My To-Do-List

To-do list UI design and development. (Code [here](#))

- Created a to-do app using React, React Router, Redux, Firebase, TransitionGroup, and love.
- Implemented JWT-based authentication, used Firebase as a back-end service.
- Created CRUD functionality, used a Firebase database for storing data, REST API for data exchange. Axios as HTTP client.
- Used SCSS as CSS pre-processor, BEM for class naming.

BeGentleman

E-commerce website UI design and development. (Code [here](#))

- Implemented multi-level filters and image slider using Vanilla Javascript.
- Used noUISlider library for making price range picker.
- Utilized SASS as CSS pre-processor, BEM as class naming methodology, Webpack as a builder.
- Added responsive design using mobile-first approach.
